

## PALMA® Roll-out Manager

Stockholm

### PALMA® Roll-out Manager

Modular Management is looking for an outstanding individual with seniority and expertise in IT Integration. As Roll-out Manager you will play an essential role in managing the roll-out and integration of PALMA® at our clients. PALMA® is a unique SaaS Solution for Product Architecture Lifecycle Management and complements many other systems, such as PLM, ERP and CPQ.

You will work with many of the greatest companies around the world, focused mainly on the manufacturing industry. Our customers are typically located in Europe, but also found in the Americas and Asia. You will travel frequently and enjoy working in a global environment.

Your focus will be on the technical side, to plan and lead integrations of PALMA® in the client IT landscape. You will also be part of planning training and support together with our consulting organization, whose focus is to include PALMA® in new client ways of working by implementing methodologies to create, document and govern product architectures.

As we are growing, you may also have secondary tasks in our organization, such as showcasing PALMA® in sales meetings, delivering proof of concept, supporting customers on software-related topics, running trainings and participating in the planning of customer enterprise architectures.

To be a successful applicant, you should have good social skills and like to interact with people. You should be structured and like planning, but also be creative when it comes to problem solving. We value that you are good at finding solutions that fit both clients and our strategy to create the best results.

Modular Management offers great development opportunities to candidates that want to join our journey, and who enjoy the challenge of working with high-caliber colleagues in a global setting. You will have the chance to make a huge impact and enable real improvements. We appreciate the importance of a sound work-life balance and respect for our internal culture and values. When not travelling, your work enables great flexibility and the possibility to manage your own time.

You will be working closely with the PALMA® development team and will form a link between them and the customer. The position is full-time and your home base will be at the PALMA® office in Stockholm, Sweden.

### Skills and Experience

The successful candidate must have:

- Several years hands-on experience as an administrator, or similar, of a system in the domains of PLM, ERP or CPQ
- Deep understanding of the concepts of these systems and what kind of information they manage
- Experience of different types of software integrations
- Great computer skills and be a fast learner
- Excellent interpersonal skills

- Project Management experience
- Relevant university degree or equivalent experience and training
- Fluency in English and Swedish.

Any of the following is of merit:

- Consulting experience
- Sales experience
- Multiple languages
- Experience from more than one system in the domains of PLM, ERP or CPQ.

## How to Apply?

Please e-mail your complete application with a short cover letter and condensed CV, preferably not more than one page each, to [malin.ekera@modularmanagement.com](mailto:malin.ekera@modularmanagement.com). We will interview candidates continuously so please apply as soon as possible.

## About Modular Management

Companies across the globe have worked with Modular Management to create and apply market driven modular product platforms in industries as varied as home appliances, industrial products, telecom, and construction equipment.

By implementing this approach, our clients have achieved dramatic improvements in business performance through increased speed and efficiency while simultaneously expanding the breadth of products offered to the market.

Using proven methods and our unique architecture lifecycle management solution, PALMA-experienced consultants partner with client resources to deploy a set of innovative tools and structured processes. Together we uncover and exploit the economic potential of the modular product architecture that lies within the markets, products, technologies, operations and support systems of our clients.

Modular Management was founded in 1996 in Stockholm, Sweden. PALMA® has been continuously developed since its first release in 2008.
